To whom it may concern

This is a response to Ecology's concerns with the Methow Wildlife Areas Miller/Harrison demolition project. Per DOE's request we have contacted the county landfill and will comply with their request to minimize waste volume and properly dispose of potentially hazardous materials. Metal siding/roofing will be salvaged or recycled. Windows, exterior doors and some of useable metal will be salvaged for use at the Wildlife Area. Electrical fixtures and any pipes that may contain mercury lead will be removed prior to demolition and sent to the county hazardous material facility to address any concerns with heavy metals. To the greatest degree possible we will salvage or recycle any remaining materials. Demolition waste that cannot be salvaged or recycled will be hauled to the county landfill. The extra trucking costs associated with recycling all of the remaining demolition waste is prohibitive.

If you have any additional questions or concerns please don't hesitate to contact me at the number below.

Regards,

Tom McCoy
